

5 SERVICES, THAT MAKE YOUR LIFE EASIER

PROJECT & DESIGN CONSULTING - FOR MORE KNOW-HOW

The earlier we talk to each other, the more successful the project will be. For this reason, our technicians are available to you as sparring partners as early as the development phase: Together with your specialists, we develop creative solutions, identify problems and reduce risks. Take advantage of the cross-industry know-how of our technicians and benefit from customised solutions for the entire life cycle of your component.

PURCHASING TASKFORCE - FOR SECURITY OF SUPPLY

In order to successfully walk the tightrope between security and the best possible price in the procurement of raw materials, our experienced Purchasing Taskforce analyses and evaluates the situation on the material markets on a weekly basis. This enables us to secure the best possible prices for our customers and at the same time guarantee security of supply.

EDI INTRODUCTION - FOR EFFICIENT EXCHANGE

By introducing Electronic Data Interchange (EDI) along the supply chain, we succeed in digitising and structuring the transmission of documents. In this way, we avoid sources of error in manual processing and increase the efficiency of document exchange. EDI works with numerous document types such as orders, shipping notes, invoices, waybills and many more. For this purpose, we set up technical interfaces between your ERP system and ours.

SUPPLY CHAIN OPTIMISATION - FOR FUTURE PLANNING

To counteract supply bottlenecks, we are getting deeper and deeper into active pre-planning based on forecast scenarios. In the process, we also adapt our own production processes and manufacture semi-finished parts in a targeted manner to prevent potential supply bottlenecks. Through pre-produced and semi-finished parts, we succeed in optimising delivery reliability together with our customers. Of course, the more reliable the forecast, the easier it is to defuse bottlenecks.

FULL-SERVICE LOGISTICS - FOR ALL-ROUND PLANNING

Our full service starts with the packaging design: In close cooperation we develop individual solutions that are precisely tailored to your internal needs and provide you with noticeable time advantages. We reduce your warehousing costs by storing your goods in consignment warehouses or by delivering them on time. In this way, you become independent of production times and also manufacture in the optimum production batch size.
